

# RTI Tracking

## Discover the Importance of RTI Tracking in Modern Logistics and Supply Chain Management

Maximize control and efficiency of your Returnable Transport Items (RTIs) with our comprehensive automated tracking solution. Whether your business relies on rental, deposit, or buy-back models, our automated tracking ensures seamless management of RTIs as ownership, possession, and liability change hands.

Capture real-time data to streamline processes, retain revenue, reduce asset loss, and optimize RTI usage. Our RTI Tracking solution supports precise inventory management and enhances business performance by automating key actions like invoicing, deposit releases, and notifications—all triggered when liability shifts occur.

Beyond operational benefits, our RTI tracking solution drives environmental sustainability. By documenting each RTI's unique environmental footprint, you can clearly demonstrate the positive impact of your efforts. With our data capture technology, you will not only minimize costs but also lead the way in eco-friendly logistics, making RTIs a crucial component of your sustainability strategy. Unlock the full potential of your RTI flow and boost your business performance with automated RTI tracking powered by Lyngsoe LIVE Logistics™.

### Benefits of RTI Tracking

Implementing RTI tracking solutions offers a wide range of benefits to organizations looking to streamline their supply chain operations and enhance efficiency. By leveraging advanced technology and data-driven insights, businesses can overcome the challenges associated with RTI management and unlock significant value throughout the supply chain. Here are some key benefits of RTI tracking:

**Improved  
Visibility**

**Optimized Asset  
Utilization**

**Reduced Loss  
and Theft**

**Enhanced  
Collaboration**

**Cost Savings**

**Retain Revenue**

## Customer Success Story

For Pack and Sea automated RTI tracking has boosted operational efficiency by ensuring the availability of assets to their customers. With a comprehensive fixed and mobile data capture infrastructure that enables full visibility of RTI whereabouts and usage Pack and Sea have seen significant value across several key areas:

- **Accurate Invoicing:** Automated, precise, and documented invoicing for the rental of fish crates.
- **Enhanced Inventory Control:** Full visibility into the location of fish crates, allowing for informed decisions on purchasing the right quantities at the right time and relocating surplus crates to harbors where they are needed.
- **Minimized Asset Loss:** Significantly reduced the loss of fish crates and ensure payments are captured when crates fall out of the flow.
- **Reduced Administrative Workload:** Cut down on the administrative tasks required to manage fish crate inventory.
- **Real-Time Liability Tracking:** Enabled automated and immediate registration of liability transfers, supported by real-time data.
- **Regulatory Compliance:** Met food traceability requirements easily and securely, with low cost and high security.

This integrated approach not only improves operational efficiency but also strengthens compliance and optimizes asset utilization, delivering substantial value to the business – all enabled by our organization's use of the automated RTI tracking solution powered by Lyngsoe LIVE Logistics™.

## Solution Description

The RTI Tracking solution powered by Lyngsoe LIVE Logistics™ is an advanced, fully integrated solution designed to revolutionize how you track and manage your RTIs (Returnable Transport Items). By combining cutting-edge x-tracking web and app software, central middleware, RFID edgware, multipurpose RFID devices and Tags, our solution enables real-time tracking of RTIs throughout your manufacturing, production, transport and supply processes.
